Redesign of Idportal Homepage

- Book: Design for new media *by LON BARFIELD*

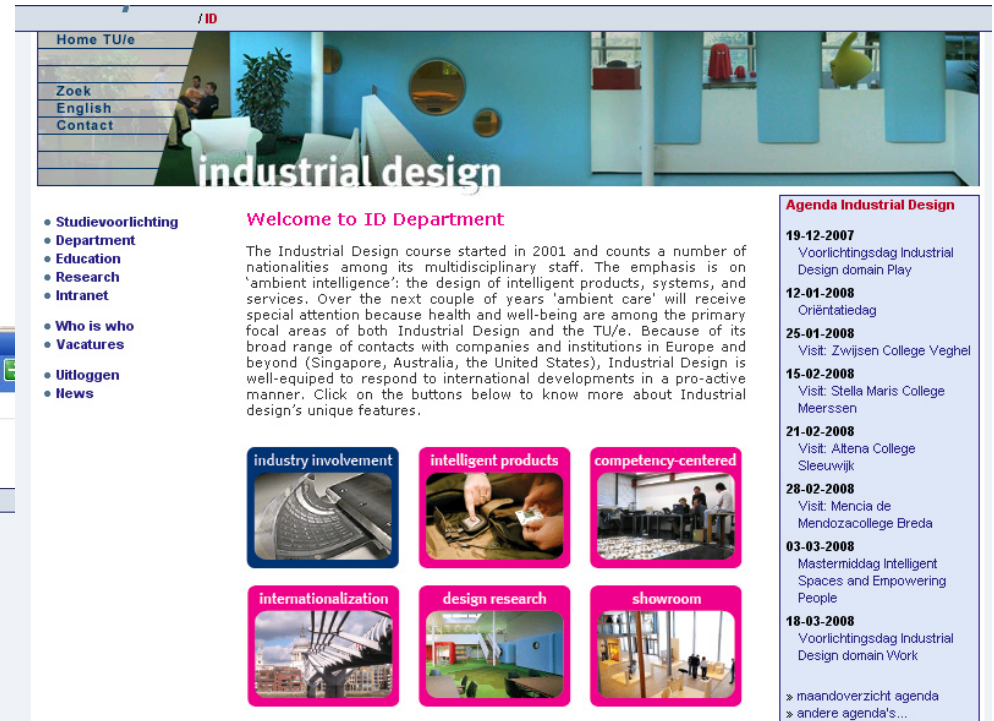

Framework of idportal homepage

- Context
- Navigation
- Structure
- Feedback
- Narrative

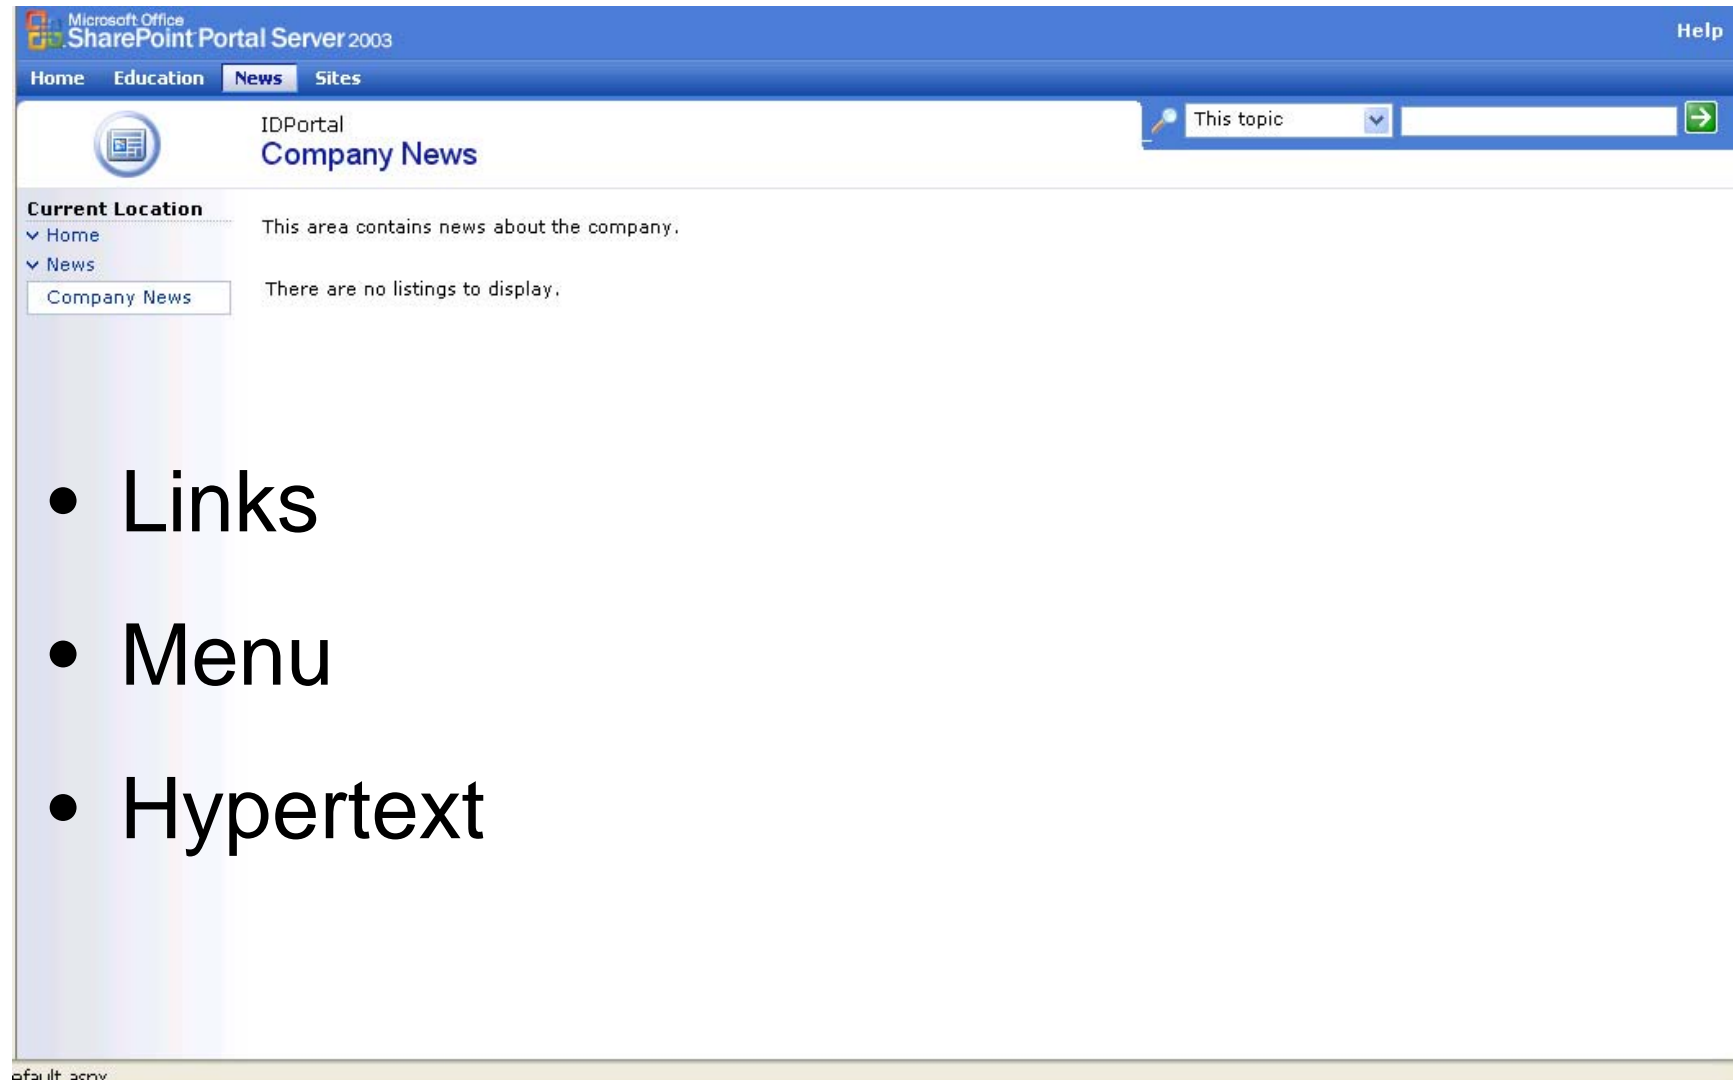

Context design

- Visual context
- Culture context

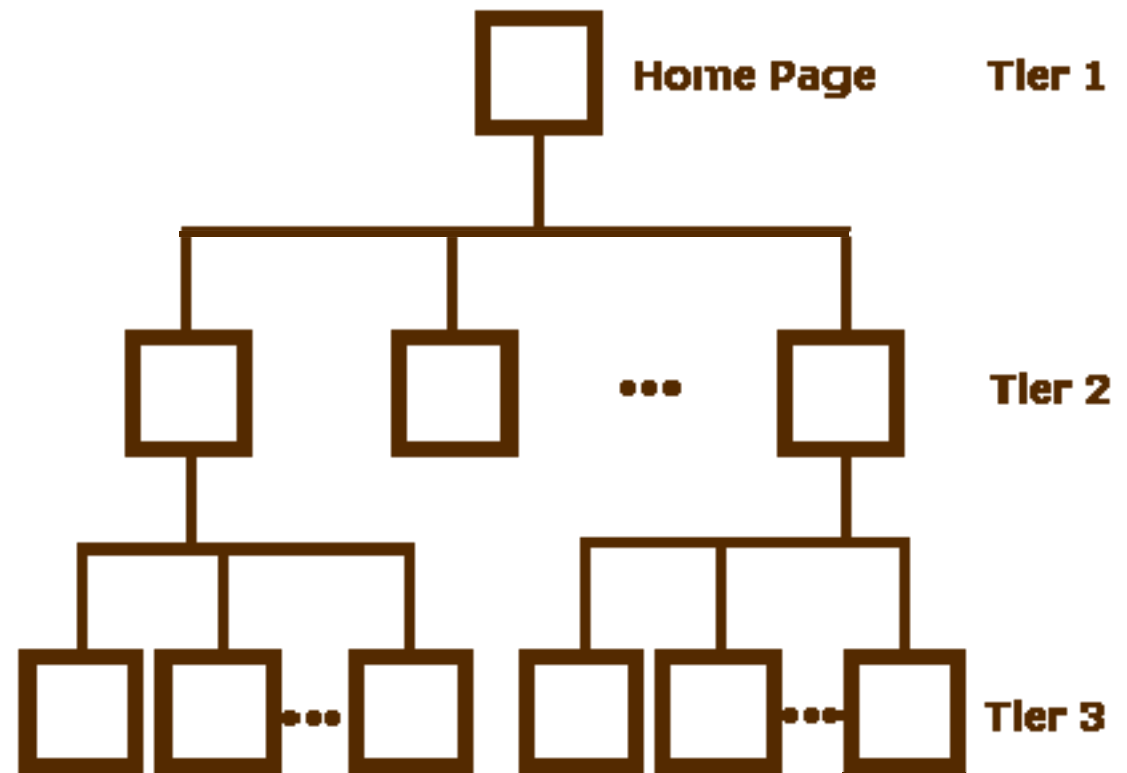

Navigation

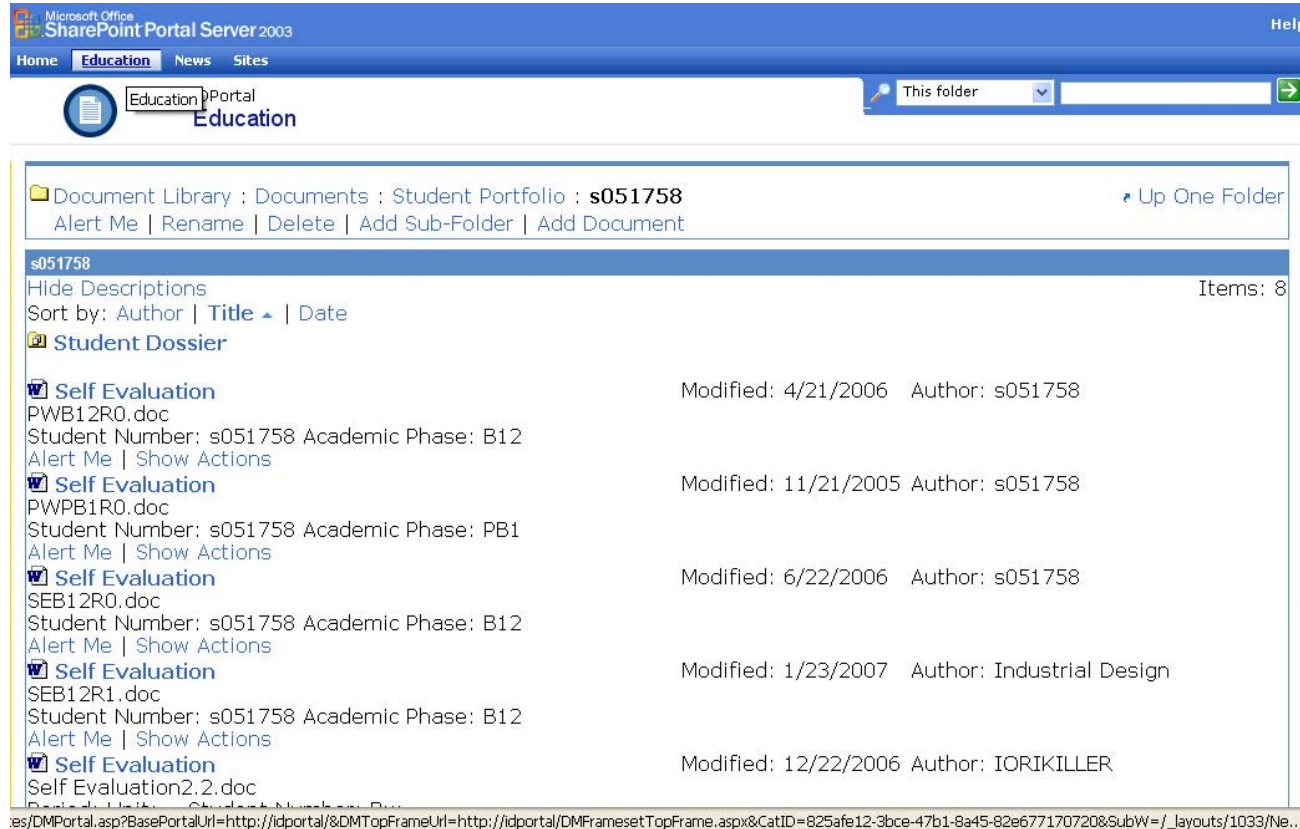

- Links
- Menu
- Hypertext

Structure

- Tree structure
- Hybrid
- Tree and linear

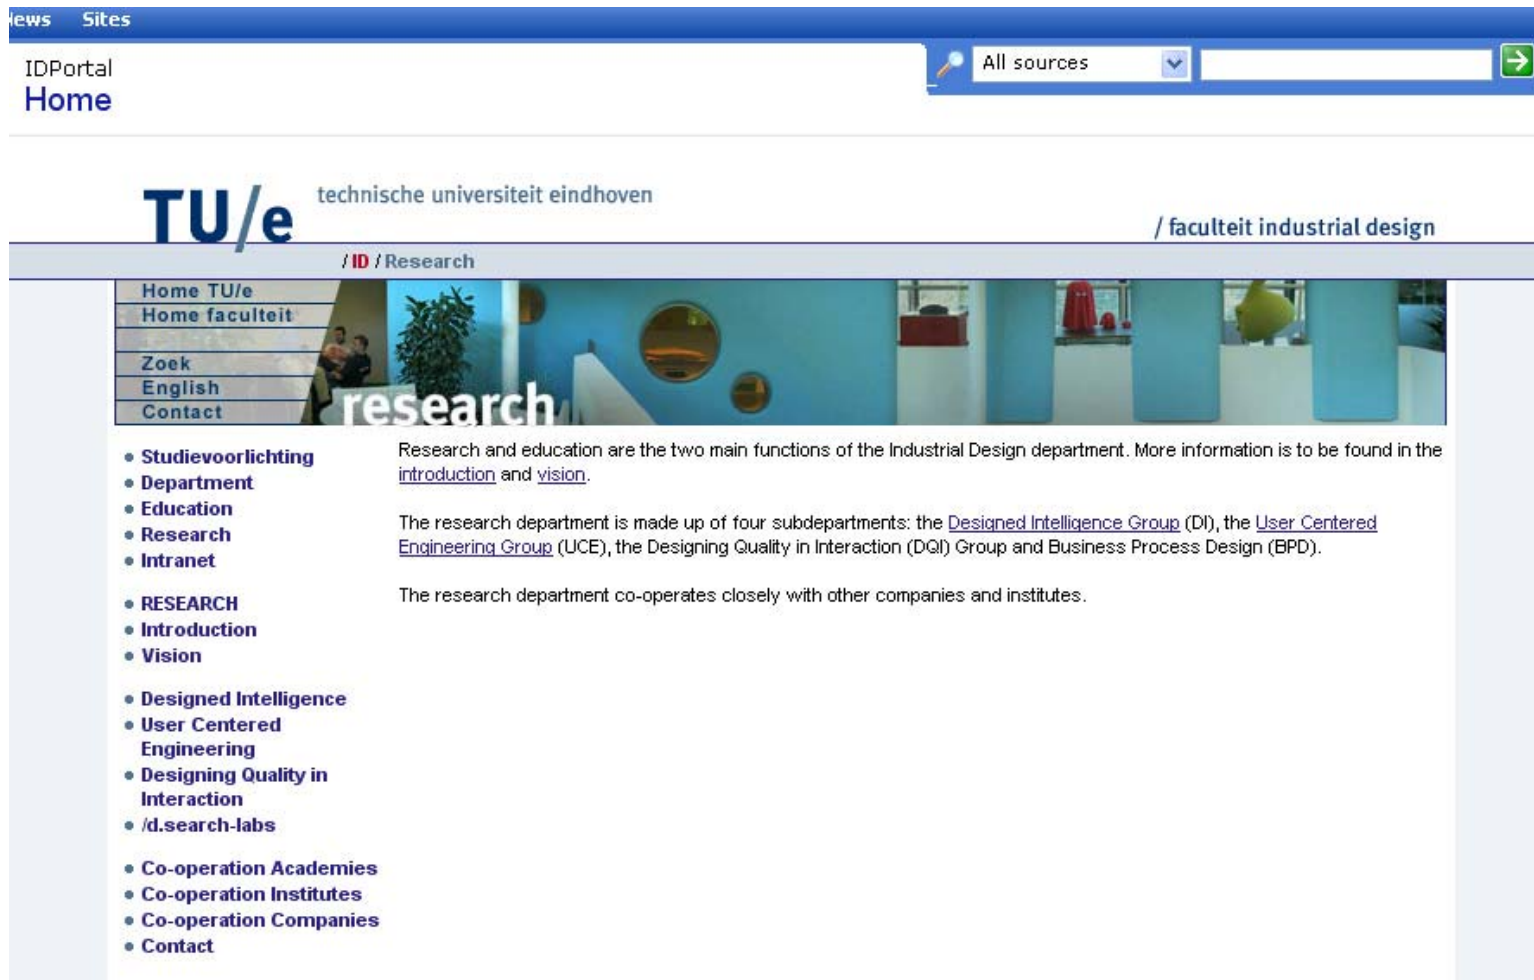

Feed-back

- Communication from the system to the user about what the system is doing or about the user's interaction with the system.

Narrative

- Not only communicate the idea but keep the user's attention

Final idea

- Information and recruitment activities
- Department
- Education
- **Research**
- Intranet
- Who is who
- General HR Information
- Log out
- News

Welcome to ID Department

The Industrial Design course started in 2001 and counts a number of nationalities among its multidisciplinary staff. The emphasis is on 'ambient intelligence': the design of intelligent products, systems, and services. Over the next couple of years 'ambient care' will receive special attention because health and well-being are among the primary focal areas of both Industrial Design and the TU/e. Because of its broad range of contacts with companies and institutions in Europe and beyond (Singapore, Australia, the United States), Industrial Design is well-equipped to respond to international developments in a pro-active manner. Click on the buttons below to know more about Industrial design's unique features.

Agenda Industrial Design

19-12-2007

Voorlichtingsdag Industrial Design domain Play

12-01-2008
