

Postdoctoral Project

1. Project introduction

As one of the first units in China setting up postdoctoral research stations, Tsinghua University has recruited over 6,500 postdoctorals since 1986. Now, it has over 1,300 postdoctorals working in its 47 postdoctoral research stations, which cover almost all of its primary disciplines. The university recruits postdoctorals all the year round. Applicants may contact the recruiting units directly. For details of the posts available and the requirements, please click

<http://zhaopin.rsc.tsinghua.edu.cn>

In order to attract more excellent overseas doctors, Tsinghua University has developed a “Tsinghua University Postdoctoral Support Program.” Those covered by this program are entitled to receive from the university an extra annual allowance of 50,000 RMB in addition to their postdoctoral performance salary. For relevant details, please see Appendix 1, Implementing Methods of “Tsinghua University Postdoctoral Support Program”. Overseas doctors may also apply for National Postdoctoral International Exchange Program --- Import Project. For details, please see Appendix 2.

2. Application criteria

Anyone receiving his/her doctoral degree within two years, excellent in character and learning, healthy, below 40, and meeting the requirements for the posts available at the research stations (<http://zhaopin.rsc.tsinghua.edu.cn>) may apply.

3. Application, examination, and approval

- (1) Applicants may apply online at Tsinghua University Postdoctoral Website: <http://postdoctor.tsinghua.edu.cn>.
- (2) The interview of the applicant by the relevant institute, department, or station.
- (3) The relevant institute, department, or station notifies the applicant who

passed the interview to prepare application materials.

- (4) The relevant institute, department, or station submits the application materials to our university and the state for examination and approval.
- (5) The relevant institute, department, or station issues the admission letter to the successful applicant.

Appendix 1: Implementing Methods of “Tsinghua University Postdoctoral Support Program”

Implementing Methods of “Tsinghua University Postdoctoral Support Program”

1. Program objects

Those who have received a doctoral degree from a well-known domestic or overseas university for nearly a year and are less than 35 years old in principle.

2. Treatment

Those covered by the “Support Program” are entitled to receive an extra annual allowance of 50,000 RMB in addition to their postdoctoral performance salary.

3. Selection procedure

- (1) The applicant submits the application to the relevant institute, department, or station (in light of the postdoctoral project application, examination, and approval procedure) in accordance with Tsinghua University postdoctoral application requirements.
- (2) The postdoctoral leading group of relevant institute, department, or station carries out examination and decides whether or not to approve the application.
- (3) The University Postdoctoral Management Office is in charge of submitting the applications of applicants passing the preliminary examination to the university for further examination and approval, and issuing admission letters to successful applicants for the postdoctoral “Support Program.”

Postdoctoral International Exchange Program --- Import Project

Postdoctoral International Exchange Program --- Import Project is a project subsidizing foreign (overseas) doctors and any Chinese scholar who returns to China after receiving a doctoral degree abroad to engage in postdoctoral research.

1. Basic requirements for applicants

- (1) Aged below 35 in principle.
- (2) Having a doctoral degree issued by one of the top 100 overseas universities in the world for nearly a year.
- (3) Having achieved outstanding research result when studied for a doctoral degree.
- (4) Able to guarantee for no less than 20 months of consecutive postdoctoral research in China.
- (5) Those who are from non-English-speaking countries are expected to have good Chinese or English understanding, speaking, reading, and writing capability.

2. Selection procedure

(1) The National Postdoctoral Management Committee Office organizes the application once a year.

(2) Those meeting the requirements contact the postdoctoral research or working stations in China by themselves.

(3) The importing unit makes the recommendation based on the quota.

(4) The National Doctor Management Office organizes the assessment, submits the relevant materials to the Ministry of Human Resources and Social Security and National Postdoctoral Management Committee Office for approval, and grants subsidy to the best applicants.

3. Term and scale

The term of subsidy shall be two years. For the first term, subsidy will be granted to 200 applicants.

4. Amount of the subsidy

Each imported applicant shall receive a subsidy of 300,000 RMB each year, including 200,000 RMB from the state and 100,000 RMB from the importing unit. The subsidy covers salary, basic insurance, housing expenses, and round-trip expenses.

Note: For the exact application date of this project, please refer to the notice on Tsinghua University Postdoctoral Website (<http://postdoctor.tsinghua.edu.cn>).
