

- 1) Obligatory task: try to implement a test program in Processing for AdMoVeo, using controlP5 components. The functionality should be as close as possible to the test program that can be downloaded from <http://wiki.id.tue.nl/creapro/AdMoVeo>. If it is too much of work to implement all of them, your test program should be able to show readings from at least 2 sensors and control at least 1 actuator using controlP5 components.
- 2) Voluntary task: try to clone Microsoft Paint in Processing. Skip the menu; focus only on changing painting tools and colors.
